- Use Tint Base Clear to reduce RTM Stains
- VOC <240 g/l (2.02 lbs/gal)

PROFESSIONAL WATER BASED PRODUCTS

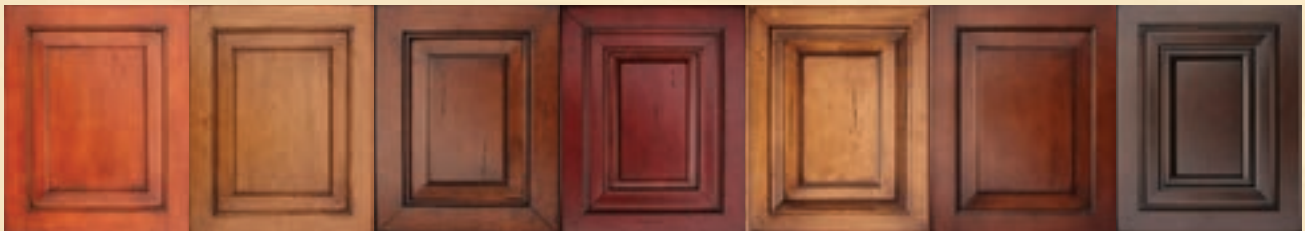

WHAT IS THE RTM STAIN SYSTEM?

General Finishes RTM (Ready To Match) stain system is a water based color matching system designed to give you the flexibility to turn ten base concentrates into an endless color pallet of rich wood tones using simple prescribed formulas.

The system comes with:

- Professional display with 4"x 5" chips samples on maple and oak
- Formula book to quickly and accurately make over 90 colors
- Ten base wood tone colors and a clear base
- Excel formula calculator

Benefits:

- Save time by getting the color you want the first time—no labor intensive experimenting necessary
- RTM will deliver your customers fast and accurate custom colors....right now!
- Save money by reducing your stain inventory— you only need eleven RTM SKU's
- Add RTM concentrates to General Finishes topcoats for toning and shading
- Plus all the cleanup and safety advantages of General Finishes great water base products

Expandable mixing stations available or use mixing lids on their own.

PROFESSIONAL WATER BASED PRODUCTS

WATER BASED TOPCOATS

General Finishes has a complete line of clear topcoats to match your performance requirements.

- Available in gallons, 5 gallon pails, and 55 gal drums
- Dry time: 10-20 minutes tack free, 30 minutes to 2 hours recoat
- No thinning necessary
- Sheens: Flat (10), Satin (35), Semi-gloss (50), and Gloss (90)
- USGBC LEED EQ 4.2
- Low VOC
- Non Flammable
- Water clean up
- No odor

2K Conversion Varnish

NEW FORMULA

- Best finish in our system. Suitable for any tough job.
- Post catalyzed, high solids for ultimate performance
- Interior and exterior rated
- Requires NCO catalyst
- Passes KCMA standards
- VOC <200 g/l (1.75 lbs./gal)

Clear Poly

- Water white - Perfect over white painted finishes
- High performance, self crosslinking, urethane
- Suitable for table tops and kitchen cabinets
- High solids content
- Passes KCMA standards
- VOC <215 g/l (1.8 lbs./gal)

Pre-Cat Lacquer

NEW PRODUCT

- Uses new small/smooth particle manufacturing technology
- Effective non-yellowing resistance
- Great durability
- Outstanding stacking/blocking properties
- VOC <250 g/l (2.1 lbs./gal)

PROFESSIONAL WATER BASED PRODUCTS

Enduro-Var

- Rich warm Amber tone, perfect for Cherry, Walnut, Mahogany
- Feels and looks like an oil base varnish,
- Excellent chemical and abrasion resistance
- Use for millwork, floors and kitchen cabinets
- Passes KCMA standards
- VOC <250 g/l (2.1 lbs./gal)

Sanding Sealer

NEW FORMULA

- High solids content
- Use with all General Finishes topcoats
- Fast film build, easily sandable, and fast drying
- VOC <226 g/l (1.89 lbs/gal)

ADDITIVES

- Available in pints, gallons, 5 gallon pails
- Use with all water base products

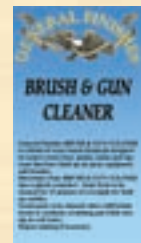

Extender

- Blended additive to increase open time, or stain dilution
- May be used with all Enduro water-based products

Accelerator

An effective additive designed to decrease dry times in water base stains, paints, and finishes.

Brush & Gun Cleaner

An effective cleaner designed to remove water base paints, stains and topcoats that build up on spray equipment and brushes.

PROFESSIONAL WATER BASED PRODUCTS

GENERAL FINISHES ENDURO

WATER BASED PIGMENTED POLY & UNDERCOATS

Exterior 450 Products

- Clear Topcoat
- Exterior Stains
- VOC <125 g/l (1.06 lbs/gal) excluding water
- Sheens: Satin, Semi-Gloss, Gloss & Flat

PROFESSIONAL WATER BASED PRODUCTS

HISTORY OF THE COMPANY

For the last twenty years General Finishes has been a recognized pioneer in the development of water base stains and finishes. Our topcoats have won several national competitions judged by Woodworking Magazine against numerous major manufacturers. Although by size not in the category of a major manufacturer, we are an aggressive supplier of water based technology to cabinet shops and manufacturers. We have the deepest lineup of water based products in our industry: pigmented stains, dye stains, pigmented polys, glazes, exterior coatings, acrylics, polyurethanes, pre-cat urethanes, sanding sealer, custom matching ability, and RTM our Ready To Match water base stain system. Let us show you what we can do for you.

Rob (our longest serving employee) joined General Finishes in 1979 at an age that required him to ride his bike to work before he got a drivers license. He was the only employee at the time, and he claims to have been in charge of everything including product development, accounting, and bank relations. We do know as factual that Rob subsequently performed every menial job possible at General Finishes before taking on meaningful work. In 1993 Rob moved from production to sales and proved to be much, much better in that capacity than anyone, including himself, ever expected. Currently Rob handles sales in the Western US and Canada. Rob also started working in research for oil products and culminated his R&D career by engineering General Finishes oil gel line in 2002.

Debbie Jaeck was born on a lily pad on legendary Phantom Lake...Debbie is Uhura to George's Captain Kirk. As the office manager of General Finishes her responsibilities include customer service, begging customers to pay their invoices and making sure the lights are turned out as the last one out the door. Debbie is married to Jeff Jaeck, our long time plant manager. After hours you can find Debbie & Jeff somewhere on Phantom Lake with a cold one and fishing pole in her hand.

We picked up Bill Strey March, 2016 from a Kenosha carwash, Bubbles. He's lived in the southeastern part of Wisconsin for as long as he can remember and calls himself a native Wisconsinite. He is youngest of four children, and at an early age was taught a wide variety of hands-on skills (including finishing), a love for the outdoors, a blue-collar work ethic, and how to survive three older sisters. He is a fan of all sports and competition, but has lived and breathed golf since he was 5 years old. Many years of working in the restaurant industry taught Bill a high level of customer service, something that he takes pride in. Bill's sales responsibilities include the upper Midwest and Northwest.

Jordan Szweczykowski didn't have to look far to find General Finishes. Born and raised in East Troy, just a few miles from the factory, he grew up learning how to build and repair things which cultivated in him a love for woodworking and finishing. After gaining experience in real estate sales and retail management, he stumbled across an ad for a position at General Finishes and drove to the factory the very next day to submit his resume. The rest, as they say is history, and Jordan is now in charge of sales across parts of the Midwest.

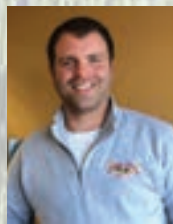

Tom Monahan was born and raised on a farm in Wisconsin where all boys learn to develop a bulldog personality and an ability to fix anything, both traits having served him well ever since. At age nine Tom learned the art of paint making from the famed Norwegian house painter Ole Peterson. Later he owned an antique restoration business and then worked as a hands-on chemist in a water based coatings company. Tom joined General Finishes in 1994 and immediately set to work developing our water based ability including our stain and our milk paint lines. His sales responsibilities are the Southeast U.S. and U.K.

Ryan Denny has a BA in chemistry from The University of Wisconsin Milwaukee and, although still a youngster, has an extensive background in wood coatings. He has developed numerous new General Finishes formulations (including the RTM system) and has updated many of our older products. He comes from the great north woods of Wisconsin, a hockey mecca, and to this day he still sees himself as the reincarnation of Bobby Orr. His hockey travels has taken him to many exotic places such as Duluth and Escanaba. His duties at General Finishes include overseeing our development laboratory, raw material production, and overall quality control. His sales responsibilities include Wisconsin.

Matt Basford joined the GF sales team in March, 2016. He has plenty of experience with the GF lines having previously sold them for 8 years at a Chicago hardwood lumber yard. Born in England, Matt moved across the pond just after his 15th birthday. No, he doesn't know the Queen or Prince William...we've asked! Now at 31 years old, he's traded in fish and chips for deep dish pizza, and with no accent remaining the only things that give him away are his love for Manchester United and tea. Matt's sales responsibilities are in the northeast.

Kyle Shepherd joined the General Finishes sales team in August of 2017. After spending 8 very looong years selling promotional products and corporate apparel, he was ready to move on to something that better suited his interests. As a hobby woodworker, taking up a career at General Finishes was a natural fit. When not working at GF, Kyle can be found spending time with his wife and daughter or puttering around in his shop. Kyle's sales territory is split between parts of the midwest and the south.
