SAFETY DATA SHEET

Chalk Style Paint "Black Pepper"

Section 1. Identification	
GHS product identifier	: Chalk Style Paint "Black Pepper"
Product code	: Not available.
Other means of identification	: Not available.
Product type	: Liquid.
Relevant identified uses o	f the substance or mixture and uses advised against
Identified uses	: Paint for wood.
Manufacturer	: General Finishes 2462 Corporate Circle East Troy, WI 53120 U.S.A. Phone no.: 262-642-4545 Toll free no.: 1-800-783-6050 Fax no.: 262-642-4707 Web: GeneralFinishes.com
Emergency telephone number (with hours of operation)	: CHEMTREC, U.S. : 1-800-424-9300 International: +1-703-527-3887 (24/7)
Section 2. Hazar	ds identification
OSHA/HCS status	: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

: SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A Classification of the substance or mixture CARCINOGENICITY - Category 1A

GHS lab	el elements

2

Signal word	: Danger	
Hazard statements	: H319 - Causes serious eye irritation. H350 - May cause cancer.	
Precautionary statements		
Prevention	 P201 - Obtain special instructions before use. P202 - Do not handle until all safety precautions have been read and understood. P280 - Wear protective gloves. Wear eye or face protection. Wear protective clothin P264 - Wash hands thoroughly after handling. 	ıg.
Response	 P308 + P313 - IF exposed or concerned: Get medical attention. P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P337 + P313 - If eye irritation persists: Get medical attention. 	
KMK Damilatari Samiaaa	Tel : +1-888-GHS-7769 (447-7769) / +1-450-GHS-7767 (447-7767) www.kmkregservices.com www.askdrluc.com www.ghssmart.com	1/

Section 2. Hazards identification

Storage	: P405 - Store locked up.
Disposal	: P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.
Hazards not otherwise	: None known

classified

Section 3. Composition/information on ingredients

Substance/mixture	: Mixture
Other means of	: Not available.
identification	

Ingredient name	%	CAS number
Nepheline syenite	≥10 - <20	37244-96-5
2,2'-Ethylenedioxydiethyl bis(2-ethylhexanoate)	≥3 - ≤5	94-28-0
Carbon black, respirable powder	≥1 - ≤3	1333-86-4
Crystalline silica, respirable powder	≤0.3	14808-60-7
N-methyl-2-pyrrolidone	≤0.3	872-50-4

United States: The exact percentage (concentration) in the composition has been withheld as a trade secret in accordance with paragraph (i) of §1910.1200.

Canada: The exact percentage (concentration) in the composition has been withheld as a trade secret in accordance with the amended HPR as of April 2018.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact	: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 20 minutes. Get medical attention.
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Skin contact	: Flush contaminated skin with plenty of water. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 20 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Ingestion	: Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Most important symptoms/effects, acute and delayed Potential acute health effects

Section 4. First aid measures

Eye contact	: Causes serious eye irritation.
Inhalation	: No known significant effects or critical hazards.
Skin contact	: No known significant effects or critical hazards.
Ingestion	: No known significant effects or critical hazards.
Over-exposure signs/symp	<u>toms</u>
Eye contact	: Adverse symptoms may include the following: pain or irritation watering redness
Inhalation	: No known significant effects or critical hazards.
Skin contact	: No known significant effects or critical hazards.
Ingestion	: No known significant effects or critical hazards.
Indication of immediate med	lical attention and special treatment needed, if necessary
Notes to physician	 Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	: No specific treatment.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media	
Suitable extinguishing media	: In case of fire, use water spray (fog), foam, dry chemical or CO ₂ .
Unsuitable extinguishing media	: None known.
Specific hazards arising from the chemical	: In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide metal oxide/oxides
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders	If specialized clothing is required to deal with the spillage, take note of any information ir Section 8 on suitable and unsuitable materials. See also the information in "For non- emergency personnel".
Environmental precautions	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods and materials for co	inment and cleaning up
0	Other Is all 'fee 'the esterial in Marian and all and for an any 'll and a state and and a state of formation

Spill	: Stop leak if without risk. Move containers from spill area. Approach release from
	upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash
	spillages into an effluent treatment plant or proceed as follows. Contain and collect
	spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or
	diatomaceous earth and place in container for disposal according to local regulations
	(see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated
	absorbent material may pose the same hazard as the spilled product. Note: see Section
	1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

Protective measures	: Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
Advice on general occupational hygiene	: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

United States

Occupational exposure limits

Ingredient name	Exposure limits
Nepheline syenite	None.
2,2'-Ethylenedioxydiethyl bis(2-ethylhexanoate)	None.
Carbon black, respirable powder	NIOSH REL (United States, 10/2016).
	TWA: 3.5 mg/m ³ 10 hours.
	TWA: 0.1 mg of PAHs/cm ³ 10 hours.
	OSHA PEL (United States, 6/2016).
	TWA: 3.5 mg/m ³ 8 hours.
	ACGIH TLV (United States, 3/2017).
	TWA: 3 mg/m ³ 8 hours. Form: Inhalable fraction
Crystalline silica, respirable powder	OSHA PEL Z3 (United States, 6/2016).
	TWA: 250 mppcf / (%SiO2+5) 8 hours. Form: Respirable
	TWA: 10 mg/m ³ / (%SiO2+2) 8 hours. Form: Respirable
	NIOSH REL (United States, 10/2016).
	TWA: 0.05 mg/m ³ 10 hours. Form: Respirable dust
	OSHA PEL (United States, 6/2016).
	TWA: 50 µg/m ³ 8 hours. Form: Respirable dust
	ACGIH TLV (United States, 3/2017).
	TWA: 0.025 mg/m ³ 8 hours. Form: Respirable fraction
N-methyl-2-pyrrolidone	AIHA WEEL (United States, 10/2011). Absorbed through skin.
	TWA: 10 ppm 8 hours.

<u>Canada</u>

Occupational exposure limits

Ingredient name	Exposure limits
Nepheline syenite	CA Ontario Provincial (Canada, 7/2015).
	TWA: 10 mg/m ³ 8 hours. Form: Total dust
Carbon black, respirable powder	CA British Columbia Provincial (Canada, 7/2016).
	TWA: 3 mg/m ³ 8 hours. Form: Inhalable
	CA Alberta Provincial (Canada, 4/2009).
	8 hrs OEL: 3.5 mg/m ³ 8 hours.
	CA Quebec Provincial (Canada, 1/2014).
	TWAEV: 3.5 mg/m ³ 8 hours.
	CA Ontario Provincial (Canada, 7/2015).
	TWA: 3 mg/m ³ 8 hours. Form: Inhalable fraction
	CA Saskatchewan Provincial (Canada, 7/2013). STEL: 7 mg/m ³ 15 minutes.
	TWA: 3.5 mg/m ³ 8 hours.
Crystalline silica, respirable powder	CA British Columbia Provincial (Canada, 7/2016).
Crystalline slitea, respirable powder	TWA: 0.025 mg/m ³ 8 hours. Form: Respirable
	CA Quebec Provincial (Canada, 1/2014).
	TWAEV: 0.1 mg/m ³ 8 hours. Form: Respirable dust
	CA Ontario Provincial (Canada, 7/2015).
	TWA: 0.1 mg/m ³ 8 hours. Form: Respirable fraction
	CA Saskatchewan Provincial (Canada, 7/2013).
	TWA: 0.05 mg/m ³ 8 hours. Form: Respirable fraction
	CA Alberta Provincial (Canada, 4/2009).
	8 hrs OEL: 0.025 mg/m ³ 8 hours. Form: Respirable particulate.
N-methyl-2-pyrrolidone	CA Ontario Provincial (Canada, 7/2015).
	TWA: 400 mg/m ³ 8 hours.

Appropriate engineering controls	If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation.

Individual protection measures

Section 8. Exposure controls/personal protection

	• •
Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.
Skin protection	
Hand protection	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Body protection	 Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection	 Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Section 9. Physical and chemical properties

<u>Appearance</u>	
Physical state	: Liquid. [Viscous.]
Color	: Gray.
Odor	: Slight
Odor threshold	: Not available.
рН	: 8 to 9
Melting point	: Not available.
Boiling point	: Not available.
Flash point	: Not available.
Evaporation rate	: Not available.
Flammability (solid, gas)	: Not available.
Lower and upper explosive (flammable) limits	: Not available.
Vapor pressure	: Not available.
Vapor density	: Not available.
Relative density	: Not available.
Solubility	: Not available.
Partition coefficient: n- octanol/water	: Not available.
Auto-ignition temperature	: Not available.

Tel : +1-888-GHS-7769 (447-7769) / +1-450-GHS-7767 (447-7767) www.kmkregservices.com www.askdrluc.com www.ghssmart.com

Section 9. Physical and chemical properties

Decomposition temperature	: Not available.
Viscosity	: Not available.
VOC content	: 24.308 g/L
Flow time (ISO 2431)	: Not available.

Section 10. Stability and reactivity

Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Incompatible materials	: Reactive or incompatible with the following materials: oxidizing materials.
Conditions to avoid	: Protect from freezing.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Chemical stability	: The product is stable.
Reactivity	: No specific test data related to reactivity available for this product or its ingredients.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
2,2'-Ethylenedioxydiethyl bis (2-ethylhexanoate)	LD50 Oral	Rat	31 g/kg	-
Carbon black, respirable powder	LD50 Oral	Rat	>15400 mg/kg	-
N-methyl-2-pyrrolidone	LD50 Dermal	Rabbit	8 g/kg	-
	LD50 Oral	Rat	3914 mg/kg	-

Irritation/Corrosion

Product/ingredient name	Result	Species	Score	Exposure	Observation
2,2'-Ethylenedioxydiethyl bis (2-ethylhexanoate)	Skin - Mild irritant	Rabbit	-	500 mg	-
N-methyl-2-pyrrolidone	Eyes - Moderate irritant	Rabbit	-	100 mg	-

Sensitization

There is no data available.

Section 11. Toxicological information

Specific target organ toxici	ty (single exposure)		
Name		Category	Target organs
Nepheline syenite N-methyl-2-pyrrolidone		Category 3 Category 3	Respiratory tract irritation Respiratory tract irritation
Specific target organ toxici	t <u>y (repeated exposure)</u>		
Name		Category	Target organs
Crystalline silica, respirable powder		Category 1	respiratory tract
Aspiration hazard There is no data available.			
Information on the likely routes of exposure	: Dermal contact. Eye conta	ct. Inhalation. Ing	estion.
Potential acute health effects	<u>5</u>		
Eye contact	: Causes serious eye irritation	on.	
Inhalation	: No known significant effec	ts or critical hazar	rds.
Skin contact	: No known significant effec	ts or critical hazar	rds.
Ingestion	: No known significant effec	ts or critical hazar	rds.
Symptoms related to the phy	vsical, chemical and toxicolog	gical characteris	<u>tics</u>
Eye contact	: Adverse symptoms may in pain or irritation watering redness	clude the followin	g:
Inhalation	: No known significant effec	ts or critical hazar	rds.
Skin contact	: No known significant effec	ts or critical hazar	rds.
Ingestion	: No known significant effec	ts or critical hazar	rds.
Delayed and immediate effect	ts and also chronic effects f	rom short and lo	ng term exposure
Short term exposure Potential immediate effects	: No known significant effec	ts or critical hazar	rds.
Potential delayed effects	: No known significant effec	ts or critical hazar	rds.
<u>Long term exposure</u>			
Potential immediate effects	: No known significant effec	ts or critical hazar	rds.
Potential delayed effects	: No known significant effec	ts or critical hazar	rds.
Potential chronic health eff	<u>ects</u>		
General	: No known significant effec	ts or critical hazar	rds.
Carcinogenicity	: May cause cancer. Risk o	f cancer depends	on duration and level of exposure.
Mutagenicity	: No known significant effec	ts or critical hazar	rds.
Teratogenicity	: No known significant effec		
Developmental effects	: No known significant effec	ts or critical hazar	rds.
Fertility effects	: No known significant effec	ts or critical hazar	rds.

Numerical measures of toxicity

Section 11. Toxicological information

Acute toxicity estimates

There is no data available.

Section 12. Ecological information

Toxicity

Product/ingredient name	Result	Species	Exposure
Carbon black, respirable powder	Acute EC50 37.563 mg/L Fresh water	Daphnia - Daphnia magna - Neonate	48 hours

Persistence and degradability

There is no data available.

Bioaccumulative potential

Product/ingredient name	LogPow	BCF	Potential
2,2'-Ethylenedioxydiethyl bis (2-ethylhexanoate)	6.1	-	high
N-methyl-2-pyrrolidone	-0.46	-	low

Mobility in soil

Soil/water partition : Not available. coefficient (Koc)

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods	: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless
	fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling empty containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

	DOT Classification	TDG Classification	IMDG	IATA
