# SAFETY DATA SHEET

Chalk Style Paint "Bone White"

| Section 1. Identi  | fication  |
|--|---|
| GHS product identifier                                     | : Chalk Style Paint "Bone White"  |
| Product code   | : Not available.  |
| Other means of<br>identification                           | : Not available.  |
| Product type   | : Liquid.   |
| Relevant identified uses o                                 | f the substance or mixture and uses advised against   |
| Identified uses  | : Paint for wood.   |
| Manufacturer   | : General Finishes<br>2462 Corporate Circle<br>East Troy, WI 53120<br>U.S.A.<br>Phone no.: 262-642-4545<br>Toll free no.: 1-800-783-6050<br>Fax no.: 262-642-4707<br>Web: GeneralFinishes.com |
| Emergency telephone<br>number (with hours of<br>operation) | : CHEMTREC, U.S. : 1-800-424-9300 International: +1-703-527-3887<br>(24/7)  |
| Section 2. Hazar   | ds identification   |
| OSHA/HCS status  | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).   |
| Classification of the substance or mixture                 | : SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A<br>CARCINOGENICITY - Category 1A   |
| GHS label elements   |   |
| Hazard pictograms  |   |

| : | Danger                                |
|---|---------------------------------------|
| : | H319 - Causes serious eye irritation. |

H350 - May cause cancer.

#### Precautionary statements

| Ρ | re  | ve  | nt | ion | l |
|---|-----|-----|----|-----|---|
|   | ••• | ••• |    |     |   |

Signal word

Hazard statements

- : P201 Obtain special instructions before use. P202 - Do not handle until all safety precautions have been read and understood.
- P280 Wear protective gloves. Wear eye or face protection. Wear protective clothing. P264 - Wash hands thoroughly after handling.

- Response
- P308 + P313 IF exposed or concerned: Get medical attention.
   P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes.
   Remove contact lenses, if present and easy to do. Continue rinsing.
   P337 + P313 If eye irritation persists: Get medical attention.

### Section 2. Hazards identification

| Storage  | : P405 - Store locked up.       |
|----------|---------------------------------|
| Disposal | : P501 - Dispose of contents ar |
|          | and international regulations.  |

: P501 - Dispose of contents and container in accordance with all local, regional, national

: None known.

# Hazards not otherwise classified

# Section 3. Composition/information on ingredients

| Substance/mixture |
|-------------------|
| Other means of    |
| identification    |

: Mixture

: Not available.

| Ingredient name                                 | %         | CAS number |
|---|-----------|------------|
| Titanium dioxide                                | ≥10 - ≤25 | 13463-67-7 |
| Nepheline syenite                               | ≥5 - ≤10  | 37244-96-5 |
| 2,2'-Ethylenedioxydiethyl bis(2-ethylhexanoate) | ≥1 - ≤3   | 94-28-0    |
| Silicon dioxide                                 | ≥1 - ≤3   | 7631-86-9  |
| Propane-1,2-diol                                | ≥1 - ≤3   | 57-55-6    |
| Crystalline silica, respirable powder           | ≤0.3      | 14808-60-7 |

United States: The exact percentage (concentration) in the composition has been withheld as a trade secret in accordance with paragraph (i) of §1910.1200.

Canada: The exact percentage (concentration) in the composition has been withheld as a trade secret in accordance with the amended HPR as of April 2018.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

| Description of necess | ary first aid measures  |
|-----------------------|---|
| Eye contact           | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Check for and remove any contact lenses. Continue to rinse for at least 20<br/>minutes. Get medical attention.</li> </ul>   |
| Inhalation            | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.  |
| Skin contact          | : Flush contaminated skin with plenty of water. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 20 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion             | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

#### Most important symptoms/effects, acute and delayed

# Section 4. First aid measures

| Potential acute health  | effects  |
|-------------------------|--|
| Eye contact             | : Causes serious eye irritation.   |
| Inhalation              | : No known significant effects or critical hazards.  |
| Skin contact            | : No known significant effects or critical hazards.  |
| Ingestion               | : No known significant effects or critical hazards.  |
| Over-exposure signs/    | symptoms   |
| Eye contact             | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness                                     |
| Inhalation              | : No known significant effects or critical hazards.  |
| Skin contact            | : No known significant effects or critical hazards.  |
| Ingestion               | : No known significant effects or critical hazards.  |
| Indication of immediate | medical attention and special treatment needed, if necessary   |
| Notes to physician      | : Treat symptomatically. Contact poison treatment specialist immediately if large<br>quantities have been ingested or inhaled. |

- Specific treatments : No specific treatment.
- Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

# Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : In case of fire, use water spray (fog), foam, dry chemical or CO <sub>2</sub> .   |
| Unsuitable extinguishing media                 | : None known.   |
| Specific hazards arising from the chemical     | : In a fire or if heated, a pressure increase will occur and the container may burst.   |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides  |
| Special protective actions for fire-fighters   | <ul> <li>Promptly isolate the scene by removing all persons from the vicinity of the incident if<br/>there is a fire. No action shall be taken involving any personal risk or without suitable<br/>training.</li> </ul> |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

### Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | lo action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>intering. Do not touch or walk through spilled material. Avoid breathing vapor or mis<br>provide adequate ventilation. Wear appropriate respirator when ventilation is<br>nadequate. Put on appropriate personal protective equipment. | st. |
|--------------------------------|---|-----|
| For emergency responders       | specialized clothing is required to deal with the spillage, take note of any information<br>section 8 on suitable and unsuitable materials. See also the information in "For non-<br>mergency personnel".   |     |
| Environmental precautions      | woid dispersal of spilled material and runoff and contact with soil, waterways, drains nd sewers. Inform the relevant authorities if the product has caused environmental ollution (sewers, waterways, soil or air).  |     |
| Methods and materials for co   | <u>ment and cleaning up</u>   |     |
| Spill                          | ton leak if without risk. Move containers from spill area. Approach release from  |     |

Spill
 Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

# Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Do not handle until all safety precautions have<br>been read and understood. Do not get in eyes or on skin or clothing. Do not ingest.<br>Avoid breathing vapor or mist. If during normal use the material presents a respiratory<br>hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the<br>original container or an approved alternative made from a compatible material, kept<br>tightly closed when not in use. Empty containers retain product residue and can be<br>hazardous. Do not reuse container. |
|--|--|
| Advice on general occupational hygiene                             | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.  |

# Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **United States**

#### **Occupational exposure limits**

| Ingredient name                                 | Exposure limits   |
|---|---|
| Titanium dioxide                                | ACGIH TLV (United States, 3/2017).                              |
|   | TWA: 10 mg/m <sup>3</sup> 8 hours.                              |
|   | OSHA PEL (United States, 6/2016).                               |
|   | TWA: 15 mg/m <sup>3</sup> 8 hours. Form: Total dust             |
| Nepheline syenite                               | None.   |
| 2,2'-Ethylenedioxydiethyl bis(2-ethylhexanoate) | None.   |
| Silicon dioxide                                 | NIOSH REL (United States, 10/2016).                             |
|   | TWA: 6 mg/m <sup>3</sup> 10 hours.                              |
| Propane-1,2-diol                                | AIHA WEEL (United States, 10/2011).                             |
|   | TWA: 10 mg/m <sup>3</sup> 8 hours.                              |
| Crystalline silica, respirable powder           | OSHA PEL Z3 (United States, 6/2016).                            |
|   | TWA: 250 mppcf / (%SiO2+5) 8 hours. Form: Respirable            |
|   | TWA: 10 mg/m <sup>3</sup> / (%SiO2+2) 8 hours. Form: Respirable |
|   | NIOSH REL (United States, 10/2016).                             |
|   | TWA: 0.05 mg/m <sup>3</sup> 10 hours. Form: Respirable dust     |
|   | OSHA PEL (United States, 6/2016).                               |
|   | TWA: 50 µg/m <sup>3</sup> 8 hours. Form: Respirable dust        |
|   | ACGIH TLV (United States, 3/2017).                              |
|   | TWA: 0.025 mg/m <sup>3</sup> 8 hours. Form: Respirable fraction |

# Appropriate engineering controls

: If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

# Environmental exposure controls

: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation.

# Section 8. Exposure controls/personal protection

#### Individual protection measures : Wash hands, forearms and face thoroughly after handling chemical products, before Hygiene measures eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that evewash stations and safety showers are close to the workstation location. **Eye/face protection** : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles. **Skin protection** Hand protection : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. **Body protection** Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Other skin protection Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Based on the hazard and potential for exposure, select a respirator that meets the **Respiratory protection** appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

# Section 9. Physical and chemical properties

| Appearance                                   |   |                    |
|--|---|--------------------|
| Physical state                               | : | Liquid. [Viscous.] |
| Color  | 1 | White.             |
| Odor   | 1 | Slight             |
| Odor threshold                               | 1 | Not available.     |
| рН   | : | 8 to 9             |
| Melting point                                | 1 | Not available.     |
| Boiling point                                | : | Not available.     |
| Flash point                                  | 1 | Not available.     |
| Evaporation rate                             | 1 | Not available.     |
| Flammability (solid, gas)                    | : | Not available.     |
| Lower and upper explosive (flammable) limits | 1 | Not available.     |
| Vapor pressure                               | 1 | Not available.     |
| Vapor density                                | : | Not available.     |
| Relative density                             | : | Not available.     |
| Solubility                                   | 1 | Not available.     |
| Partition coefficient: n-<br>octanol/water   | 1 | Not available.     |

# Section 9. Physical and chemical properties

| Auto-ignition temperature | 1 | Not available. |
|---------------------------|---|----------------|
| Decomposition temperature | : | Not available. |
| Viscosity                 | 1 | Not available. |
| VOC content               | : | 20.019 g/L     |
| Flow time (ISO 2431)      | : | Not available. |

## Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | : Protect from freezing.   |
| Incompatible materials             | : Reactive or incompatible with the following materials: oxidizing materials.                          |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

## Section 11. Toxicological information

#### Information on toxicological effects

#### Acute toxicity

| Product/ingredient name                             | Result                   | Species | Dose                   | Exposure |

| Eye contact   | : Causes serious eye irritation.                    |                        |                              |  |
| Inhalation  | : No known significant effects or critical hazards. |                        |                              |  |
|   | : No known significant effects or critical hazards. |                        |                              |  |

: No known significant effects or critical hazards.

#### Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |
|--------------|--|
| Inhalation   | : No known significant effects or critical hazards.  |
| Skin contact | : No known significant effects or critical hazards.  |
| Ingestion    | : No known significant effects or critical hazards.  |

#### Delayed and immediate effects and also chronic effects from short and long term exposure

| <u>Short term exposure</u>    |     |   |
|-------------------------------|-----|---|
| Potential immediate effects   | :   | No known significant effects or critical hazards.                           |
| Potential delayed effects     | 1   | No known significant effects or critical hazards.                           |
| Long term exposure            |     |   |
| Potential immediate effects   | :   | No known significant effects or critical hazards.                           |
| Potential delayed effects     | 1   | No known significant effects or critical hazards.                           |
| Potential chronic health effe | ect | <u>s</u>  |
| General                       | 1   | No known significant effects or critical hazards.                           |
| Carcinogenicity               | 1   | May cause cancer. Risk of cancer depends on duration and level of exposure. |
| Mutagenicity                  | 1   | No known significant effects or critical hazards.                           |
| Teratogenicity                | 1   | No known significant effects or critical hazards.                           |
| Developmental effects         | 1   | No known significant effects or critical hazards.                           |
| Fertility effects             | 1   | No known significant effects or critical hazards.                           |

### Section 11. Toxicological information

Numerical measures of toxicity

Acute toxicity estimates

There is no data available.

# Section 12. Ecological information

#### **Toxicity**

| Product/ingredient name              | Result  | Species   | Exposure                                     |
|--------------------------------------|---|---|--|
| Titanium dioxide<br>Propane-1,2-diol | Acute LC50 >1000000 μg/L Marine water<br>Acute EC50 >110 ppm Fresh water<br>Acute LC50 1020000 μg/L Fresh water<br>Acute LC50 710000 μg/L Fresh water | Fish - Fundulus heteroclitus<br>Daphnia - Daphnia magna<br>Crustaceans - Ceriodaphnia dubia<br>Fish - Pimephales promelas | 96 hours<br>48 hours<br>48 hours<br>96 hours |

#### Persistence and degradability

There is no data available.

#### **Bioaccumulative potential**

| Product/ingredient name                             | LogPow | BCF | Potential |
|---|--------|-----|-----------|
| 2,2'-Ethylenedioxydiethyl bis<br>(2-ethylhexanoate) | 6.1    | -   | high      |
| Propane-1,2-diol                                    | -1.07  | -   | low       |

#### Mobility in soil

Soil/water partition coefficient (Koc) : Not available.

#### Other adverse effects

: No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** 

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling empty containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

# Section 14. Transport information

|                               | 1                  |                    |                |                |
